Notice of Allowability	Application No.	Applicant(s)
	09/904,324	MUSIKKA, NIILO
	Examiner	Art Unit
	Albert T. Chou	2662
The MAILING DATE of this communication appears on the cover sheet with the correspondence address All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS. This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.		
1. This communication is responsive to <u>May 19, 2005</u> .		
2. The allowed claim(s) is/are 1-3, 6-14 and 18 (Renumberred 1-13).		
3. The drawings filed on 7/12/2001 are accepted by the Examiner.		
4.		
Attachment(s)  1. Notice of References Cited (PTO-892)  2. Notice of Draftperson's Patent Drawing Review (PTO-948)  3. Information Disclosure Statements (PTO-1449 or PTO/SB/C Paper No./Mail Date  4. Examiner's Comment Regarding Requirement for Deposit of Biological Material	6. ☐ Interview Summary Paper No./Mail Da 08), 7. ☐ Examiner's Amend	ate

## Response to Amendment

- 1. The following is a response to the amendment filed on May 19, 2005.
  - Claims 1-3, 6-14 and 18 are allowed.
- 2. The following is an examiner's statement of reasons for allowance:

The claims 1-3, 6-14 and 18 are allowable over the prior art of record since the cited reference taken individually or in combination fail to teach or fairly suggest "a user plane for both the GSM system and the UMTS system uses a common Media Gateway (MGW) and wherein said IP-based GSM system includes a Mobile Switching Center (MSC), at least one Base Station Controller (BSC) and at least one Radio Base Station (RBS), wherein said UMTS system includes at least one Radio Network Controller (RNC), and wherein a control plane of the MSC Is terminated in a MSC server and a control plane of the RNC/BSC is terminated in a Radio Network Server (RN Server), and wherein the MSC server, the RN Server, the MGW and all BBSs are connected to the common IP network" as recited in independent claims 1 and 13. It is noted that the closest prior art, Le et al. (US Patent No. 6,556,820), teaches a hybrid GSM/UMTS core network, connecting to an Internet/Intranet network, provides both GSM radio access and UMTS radio access to other multimedia networks and forms a common IP network. However, Le does not teach each of RBSs, the RN server and MSC server are connected to the same network through an the IP router as recited in claims 1 and 13.

Art Unit: 2662

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Albert T. Chou whose telephone number is 571-272-6045. The examiner can normally be reached on 8:30 - 17:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hassan Kizou can be reached on 571-272-3088. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
